Vinyl Fencing System

Modern look and reliability
at a reasonable price

The Pietrucha Group

Proudly Polish Truly International

The Pietrucha Group is a Polish family company specializing in the manufacturing and distribution of highest quality plastic products that may be broadly used in construction and engineering projects.

We deliver our products and services to nearly 3500 customers in 35 countries. Despite the scope of its operations, the Pietrucha Group has remained a family business, managed by a third generation of entrepreneurs.

Vinyl Fencing System

The Pietrucha Group is the manufacturer of a wide range of vinyl fencing, an advanced, durable and aesthetic solution with exceptional usage parameters.

5 reasons to choose the vinyl fences by Pietrucha Group:

- No need to paint and impregnate
- Resistant to biological damage
- Resistant to humidity, extreme temperatures and UV radiation
- Aesthetic, modern look
- Easy to assemble and maintain

Vinyl fences are resistant to the impact of atmospheric conditions, including UV radiation, humidity or extreme temperatures. The elements of the system do not corrode as in the case of wood, do not rot as metal.

Technology

The vinyl fences by Pietrucha are made of high quality vinyl polichloride (PVC) reinforced with special components enhancing the durability and resistance to ageing.

Thanks to the continuous monitoring and implementation of strict manufacturing procedures, we guarantee high and consistent quality of our products. An advanced machine park coupled with over 20 years' experience in plastics processing guarantee the highest quality of the products manufactured by the Pietrucha Group.
